GitHub: https://github.com/flyinvaishakh Mobile: +91-7676839625

Skills

Languages: C/C++, Python, JavaScript (ES6+), TypeScript, Bash
Frameworks and Technologies: HTML5, CSS3, React.js, Next.js, Tailwind CSS, Node.js, Express.js, RESTful API's
Databases: MongoDB, MySQL, PostgreSQL, Supabase
Cloud & DevOps: AWS (EC2, S3, VPC, Lambda, Cognito), Docker
Core Competencies: Problem Solving, Adaptability, Empathy

Projects

AutoScrape – GUI Based Web Scraping Platform| NextJs, TypeScript, ReactFlow Mar 2025 – Sep 2025

- Architected a hybrid web scraping system combining rule-based extraction with LLM-driven (Gemini) parsing to accurately handle dynamic and unstructured web content.
- Developed a scalable SaaS platform with secure authentication, subscription billing integration, and cron-based scheduled scraping pipelines.
- Enhanced performance and user experience by implementing server-side rendering (SSR) and optimized state management, reducing load times and improving responsiveness.

Synthiq – Avatar Video Generation | NextJs, TypeScript, AWS, Inngest Oct 2025 – Nov 2025

- Built a full-stack AI-driven SaaS platform to generate realistic talking avatar videos with voice cloning, multilingual translation, and an intuitive user dashboard.
- Designed and implemented dynamic avatar rendering and lip-syncing pipelines to produce high-quality, human-like video outputs.
- Enabled seamless multilingual content generation by integrating AI-based translation, voice synthesis, and synchronized facial animation.

HireLens – Remote Interview Platform | ReactJs, MongoDb, ExpressJs, NodeJs Feb 2024 – Jan 2025

- Developed a full-stack remote interview platform integrating real-time video calling, collaborative coding (Monaco/VSCode editor), and chat for seamless technical interviews.
- Engineered secure code execution with automated test case evaluation and real-time feedback, enabling a LeetCode-like interview experience within live sessions.
- Built a scalable system with authentication (Clerk), async background jobs (Inngest), and optimized data fetching (TanStack Query) to ensure low-latency, reliable performance.

Training

RedHat Academy | Certificate Jun 2025 – Jul 2025
Bash Scripting in Linux

- Developed shell scripts for user account creating, disk usage monitoring, automated backups and network configuration(static IPs, DNS)
- Dmanaged firewall rules(iptables, firewalld) to enforce control and strength system security
- Gained hands-on exposure to Linux system hardening, authentication methods, and encryption practices

Certificate

- The Complete JavaScript Course 2025: From Zero to Expert! -- Udemy
- Node.js, Express, MongoDB & More: The Complete Bootcamp -- Udemy
- The Ultimate React Course 2025: React, Next.js, Redux & More --Udemy

Education

Lovely Professional University **Punjab, India**
Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.18*** *Since Aug 2023*

Vidya Jyothi PUC College **Karnataka, India**
Intermediate; **Percentage: 78** Mar 2021-Sept 2022

The Jain International School **Karnataka, India**
Matriculation; ***Percentage: 80*** *Apr 2019 – Mar 2020*
